### Overview of Position:

Manufacturing Maintenance Solutions (MMS) looking for Multi Skilled Maintenance Technician. Service technicians will be assigned to a customer and report to the customer's site daily. Must have 3+ years' experience troubleshooting and repairing CNC machine tool mechanical components. Must have experience replacing way bearings, ball screws, adjusting machine geometry and repairing hydraulic components. Experience in scraping is a plus.

#### Working conditions:

- Protective eyewear and hearing protection is required in shop areas at all times.
- Temperatures may range from 40-120 degrees, depending on the area of the plant an individual may be working in.
- Job duties may require outside work at any time during the year.
- Job duties may require working from ladders or platforms above floor level. Job duties may involve the use of solvents, oils, grease, etc. Appropriate personal protective equipment is required.

### Required Skills & Qualities:

- Minimum 3 years' experience in maintenance field, **Industrial maintenance experience with CNC machine tool repair is a must.**
- Proficiency in two or more of the following: Electrical maintenance, (PLC experience a big plus) mechanical maintenance, millwright, welding, and pipe fitting
- Ability to use hand tools, small powered equipment (saws, drills, etc.), and other shop equipment
- Knowledge of hydraulics and pneumatics
- Ability to carry out verbal and written instructions, and prepare simple written reports
- Ability to analyze information and to make an informed decision based on that information
- Ability to use and understand maintenance CMMS systems is a plus
- Ability to work with a minimum of supervision in a team environment. Will work alone or as a member of a work crew, depending on the work assignment
- Strict adherence to safety regulations and policies
- Ability to handle physical workload
- Must have a valid state driver's license, vehicle insurance and dependable vehicle
- Must be a U.S. citizen or permanent resident of U.S.

## Responsibilities:

- Accountable for the equipment with which the employee works or has control over, as well as the need for observation of the process/product to minimize product loss.
- Responsible for any equipment requiring maintenance work.
- Responsible for maintaining accurate parts use records.
- Responsible for all materials and tools used on the job or special projects
- Responsible for maintaining product integrity.
- Responsible for company equipment.
